- MTAP_PAYMENT_DETAIL_REPORT will show all payments made by the business unit entered for the date range selected
- Run this query regardless of how the suppliers get marked for 1099 reporting
 - Doing this will reduce corrections & help realize the volume of your agency's 1099 MISC/NEC reporting
- Sorting the query will help you quickly determine if all but one or a few payments have been marked for reporting

Verifying Reporting Information

In the query results shown, you will notice the variation in the withholding code information

➔

If Jim's Tree Trimming was paid for the same type of services for each payment, the withholding information should be consistent

➔

If you see a supplier with a business name that clearly indicates a service provided, but is not marked, you may want to investigate further
